Exp-1

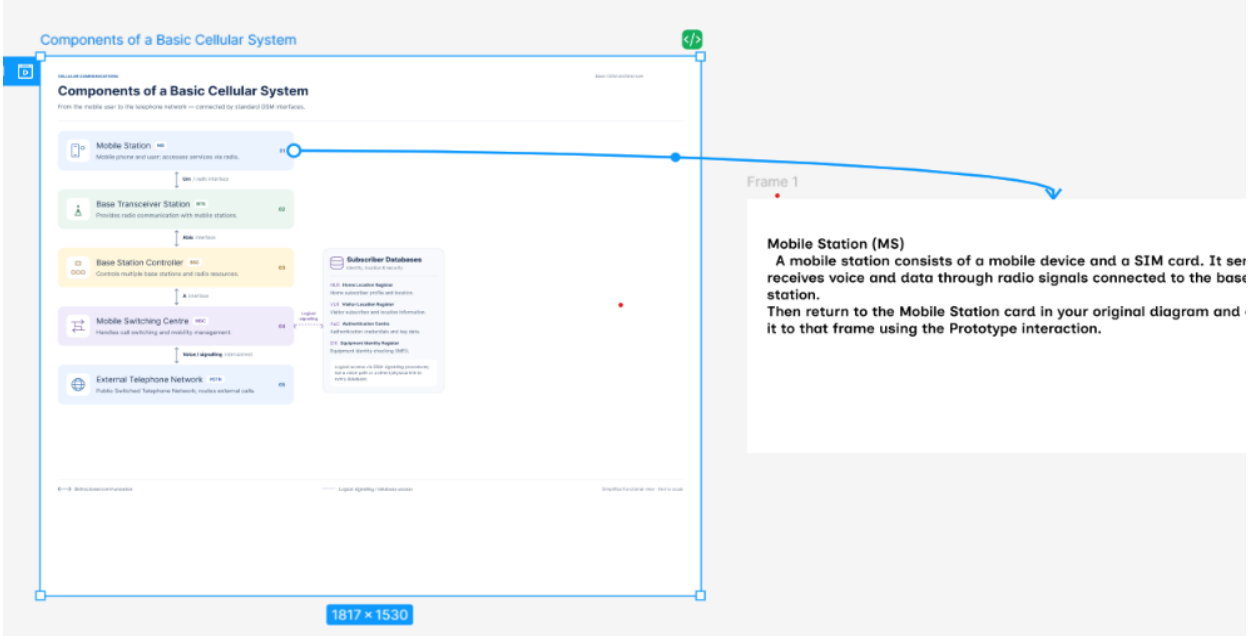

Aim

To design an interactive diagram illustrating the components of a basic cellular system using Figma and demonstrate their functions through clickable prototype interactions.

Procedure

1. Open Figma and create a new design file.
2. Create a diagram titled Components of a Basic Cellular System.
3. Add the Mobile Station (MS), Base Transceiver Station (BTS), Base Station Controller (BSC), Mobile Switching Centre (MSC), Subscriber Databases, and External Telephone Network.
4. Connect the components using arrows and label the communication interfaces.
5. Create a separate frame containing an explanation of each component.
6. Use the Prototype tab to connect the component cards to their corresponding explanation frames with click interactions.
7. Run the prototype using the Present button and verify that the interactions work correctly.

Result

Successfully designed and tested an interactive cellular system diagram in Figma, illustrating the major components, their communication links, and their functions through clickable prototype interactions.
